

Assignment – 03:

Problem Statement:

Write a program in C to generate multiplication tables for a given number.

Code:

```
#include <stdio.h>

int main()
{
    int num,i=1;
    printf("Enter a number: ");
    scanf("%d",&num);
    printf("The multiplication table (upto 10) of %d is: \n",num);
    while (i<=10)
    {
        printf("%d*%d = %d\n",i,num,num*i);
        i++;
    }
}
```

Input & Output:

```
Enter a number: 12
The multiplication table (upto 10) of 12 is:
1*12 = 12
2*12 = 24
3*12 = 36
4*12 = 48
5*12 = 60
6*12 = 72
7*12 = 84
8*12 = 96
9*12 = 108
10*12 = 120
```
