

Assignment – 07:

Problem Statement:

Write a C program to accept student details and display their result using an array of structures.

Code:

```
#include <stdio.h>

struct student
{
    int roll;
    char name[50];
    int m1, m2, m3;
    int total;
    float avg;
}s[10];

int main()
{
    int n, i;
    printf("Enter number of students: ");
    scanf("%d", &n);
    for(i = 0; i < n; i++)
    {
        printf("\nEnter details of student %d\n", i+1);
        printf("Roll No: ");
        scanf("%d", &s[i].roll);
        printf("Name: ");
        scanf("%s", s[i].name);
        printf("Marks in 3 subjects: ");
        scanf("%d %d %d", &s[i].m1, &s[i].m2, &s[i].m3);
        s[i].total = s[i].m1 + s[i].m2 + s[i].m3;
```

```

        s[i].avg = s[i].total / 3.0;
    }
    printf("\n--- Student Results ---\n");
    for(i = 0; i < n; i++)
    {
        printf("\nRoll No: %d", s[i].roll);
        printf("\nName: %s", s[i].name);
        printf("\nTotal Marks: %d", s[i].total);
        printf("\nPercentage: %.2f\n", s[i].avg);
    }
}

```

Input & Output:

```

Enter number of students: 3

Enter details of student 1
Roll No: 101
Name: Michael
Marks in 3 subjects: 78 98 89

Enter details of student 2
Roll No: 102
Name: Jacob
Marks in 3 subjects: 95 67 54

Enter details of student 3
Roll No: 103
Name: Roy
Marks in 3 subjects: 76 87 99

```

```

--- Student Results ---

Roll No: 101
Name: Michael
Total Marks: 265
Percentage: 88.33

Roll No: 102
Name: Jacob
Total Marks: 216
Percentage: 72.00

Roll No: 103
Name: Roy
Total Marks: 262
Percentage: 87.33

```
