

Assignment – 14:

Problem Statement:

Write a C program to input a binary number from the user and convert it into a decimal number.

Code:

```
#include <stdio.h>

int main()
{
    int binary, decimal=0, base=1, digit;
    printf("Enter a Binary Number: ");
    scanf("%d", &binary);
    while (binary!=0)
    {
        digit=binary%10;
        decimal=decimal+digit*base;
        binary=binary/10;
        base=base*2;
    }
    printf("Decimal Number = %d\n", decimal);
}
```

Input & Output:

```
Enter a Binary Number: 1101
Decimal Number = 13
```

```
Enter a Binary Number: 1010
Decimal Number = 10
```

```
Enter a Binary Number: 0011
Decimal Number = 3
```
